

**Perform Peripheral
Intravenous Cannulation and
Iron Infusion**
COURSE INFORMATION

Course snapshot

COURSE TITLE	Perform Peripheral Intravenous Cannulation and Iron Infusion
COURSE SUMMARY	<p>The Perform Peripheral Intravenous Cannulation and Iron Infusion course is evidence based and the techniques taught are designed to promote the best practice outcomes for patient care.</p> <p>Due to the specialist nature of this course and the need to provide specialist facilitation. The on-site delivery mode enables specialist facilitation and allows the course material to be contextualised to meet the needs of students.</p>
VALUE FOR ORGANISATIONS	<p>Develop knowledge around the role of iron in blood and learn practical skills for iv cannulation insertion, maintenance and removal that will support the appropriate clinical treatment for your patient. Understanding the risks and benefits of iron infusion, and considerations for good technique for safe practice for iv cannula insertion and removal.</p>
UNITS OF COMPETENCY	HLTHPS009 Perform peripheral intravenous cannulation
COST	\$450 (Inc. GST) per student
PRE-READING	There is no pre-reading for this course.
DELIVERY & ASSESSMENT	Half day face-to-face workshop (approx. 5 hours), in-class activities assessed by a qualified assessor, mandatory third party observed workplace activity, online assessment completed via our online learning management system accessIQ.
ESTIMATED HOURS OF STUDY	10 hours of active learning.
CPD HOURS	As a general guide, one (1) hour of active learning equates to one (1) hour of CPD. It is the responsibility of the individual student to calculate how many hours of active learning have been completed. The hours of active learning estimated above should act as a guide to CPD hours.
ENTRY REQUIREMENTS	This course is open to registered nurses, enrolled nurses, registered Aboriginal Torres Strait Islander health practitioners and emergency workers for whom peripheral intravenous cannulation is part of the job role, including those working in hospitals, primary health care in rural remote locations, pathology services, out-of-hospital settings or in other allied health care environments.
TERMS AND CONDITIONS	<p>Visit benchmarkgroup.com.au/terms-and-conditions View Student Handbook</p>

Course outline

The Perform Peripheral Intravenous Cannulation and Iron Infusion course is evidence based and the techniques taught are designed to promote the best practice outcomes for patient care.

The course is designed to provide students with the skills and knowledge required to perform peripheral intravenous cannulation on clients specifically for providing iron infusion.

Course outcome

On completion of this course students will be able to:

- Understand the role of iron in the blood
- Understand the elements of iron deficiency
- Understand the risks of iron infusions
- Gain understanding of iron infusion in practice.
- Assess the need for cannulation and correctly identify pathology requests and client
- Choose the appropriate size cannula
- Discuss the considerations that influence the correct selection of intravenous cannula size and insertion site
- Perform peripheral intravenous cannulation
- Demonstrate the technique of peripheral intravenous cannula insertion, including securing the cannula insitu
- Manage the cannula until the time it is no longer required and removal of the cannula is to be performed
- Safely remove the intravenous cannula
- Trouble shoot problems
- Discuss and manage possible complications

Course content

The Perform Peripheral Intravenous Cannulation and Iron Infusion course will enable participants to enhance their ability to understand the role of iron in the blood and the elements related to iron deficiency and prepare for, perform and monitor peripheral intravenous cannulation successfully.

Course structure

To achieve competency in the Perform Peripheral Intravenous Cannulation and Iron Infusion course, students must successfully:

- Perform intravenous cannulation in a simulated environment
- Complete three (3) workplace observed peripheral intravenous cannulations, from insertion to removal.

Workplace observed practice is a mandatory requirement for this course; workplace practice must be observed by a supervisor that performs the identified tasks as part of their role.

All workplace activities must be completed in accordance with work health and safety standards and all other relevant workplace policies and procedures.

The minimum cost for group delivery is \$4,500.

Please note, closed footwear is required for the workshop.

About accessIQ

We are paving the way for innovative and easy online learning through our bespoke online course and assessment platform, accessIQ.

- Study anywhere, anytime
- Edit saved answers, review before submitting
- Live student console – tracks assessment, enrollments and waitlists
- Access statement of results and resource library.

About Benchmark Group

Benchmark Group is a Registered Training Organisation (RTO 21824) delivering a range of clinical skills courses to meet the needs of a broad range of health professionals across Australia.

As an RTO working in the health sector, our focus is on the delivery of courses and courses designed to provide healthcare professionals with the opportunity to expand their skills and careers. We concentrate on skills and knowledge that can be immediately implemented in a vocational context.

Skills learnt today can be used tomorrow.
